# Fire Escape

We have to ask you to make yourself familiar with escapes in case of a fire.

## Hot Tub

Our hot tub is open year-round except a few days when we are replacing the water.

The hot tub was upgraded in 2009 with electronic controls and a new cover.

You are welcome to use it at almost any time of the day. The outside lights are turning on at dusk and shut off automatically around 10pm. While the umbrella protects you in the summertime from the sun - it will keep your hair dry during the rainy season.

We are using bromine (not chlorine) and are watching the water quality year around.

# Computer

You can access our wireless Internet - the access code is:

86DB39FA59

If you do not have your notebook with you but want to use the Internet - feel free to use our computer in the den.... And Bernd will be always ready to give you a hand in case that you get stuck.

And if you need to print, our network is setup so you can access our colour laser printer - you will have to ask Bernd how to access it.

In case that you have to print a lot, there might be a small charge for toner and paper.

## TV / DVD

You will find in each unit a 19" flat panel Tv. To make the choice of channels easier here is a list of channels:

- |    |                              |     |                               |
|----|------------------------------|-----|-------------------------------|
| 2  | TV Listings                  | 32  | Family Channel - West         |
| 3  | CBC Vancouver                | 33  | WPCH Peachtree TV             |

# Teepee

The teepee is located at the north side of our B&B. The canvas was purchased from the natives near Calgary.

In Europe a teepee is known as wigwam. It is a well liked meeting point during cool summer evenings and during rainy days all year long.

Although we kept the teepee authentic we installed a wooden floor around the fire pit. If we do not sit in it - just ask us to make a fire. You will like some of the stories we have to tell about the problems getting the teepee up - at a glass of wine or a beer (at our expense).

... And we are always interested in hearing from our guests about their trip and their home town or country.

# Tennis Court

Feel free to play a set or more on our professional sized tennis court. .

If you forgot your racquet, use one of ours; you will also find tennis balls.

For those of our guests who started late and it is getting dark our flood lights will keep them going.

You don't play tennis? Practice your basketball skills - you will find a ball on our main deck.

## Games

Mexican Train or Mexican Domino gains more and more popularity.

This game is entertaining the rules are very simple. Generally it takes just one test game and everybody can play it.

We have a number of other board games on hand - from Chess, Checker, Mensch ärgere Dich Nicht.. And so on.

We also offer to play the WII in our lounge - our selection of add-ons is steadily increasing - just ask how to set it up!

## Laundry & Freezer

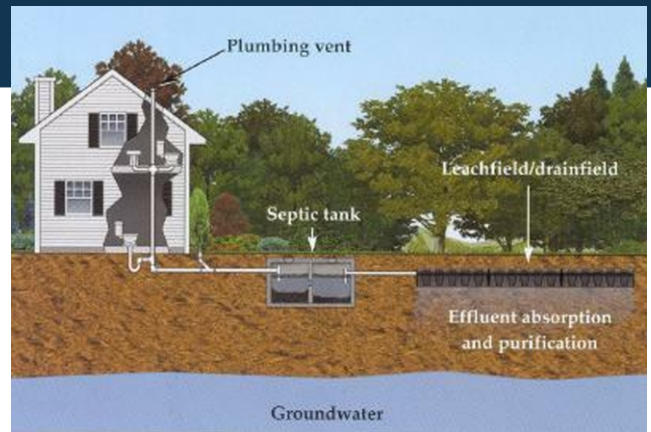

If you are staying for a while or have been on the road for days - you may want to use our laundry facilities for a fee of \$5.00/load

If you are not familiar with our kind of washer & dryer, do not hesitate to ask Brigitte for assistance.

... And if you are lucky and caught that trophy salmon - we will be glad to keep it frozen until your departure.

# Septic Field

Black Creek does not have a septic system in place. So all the properties have a septic field.

You will most likely not even notice a difference from the big-city-sewer system. Our septic tank is twice the size as required for the size of our house and is being maintained twice as often as recommended.

A septic field requires some attention and we ask our guests to throw as little as possible into the toilet. We will clean the waste baskets daily - if required.

We have public water - it is tested constantly and is considered "very good".
